[3]EMBL, Germany, [4]University of Bradford, United Kingdome. [5]IFB-core, Institut Français de Bioinformatique (IFB), CNRS, INSERM, INRAE, CEA, France. [6]Clermont Auvergne, Plateforme AuBi and Mésocentre Clermont-Auvergne, France

The Galaxy Training Network (GTN) offers a robust platform for bioinformatics training, complementing the ELIXIR Training Platform.

With 35+ topics, 470+ tutorials, and 25+ learning pathways, GTN provides comprehensive educational experiences, extending beyond Galaxy to include AI and programming language.

The Galaxy Training Network offers a technically advanced and user-friendly platform that complements the ELIXIR Training Platform and its Training Life Cycle.

Its commitment to FAIR principles, community engagement, and innovative features makes it a valuable resource for the bioinformatics training community
