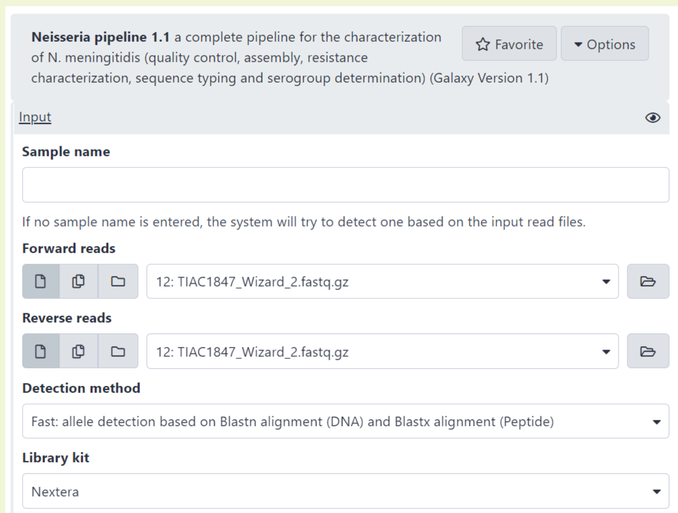
Custom 'Push-button' workflows

Species	Interface	Report (interactive)

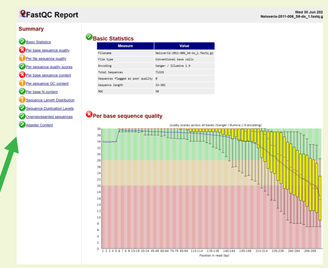
Bacteria
E. coli
E. faecalis
E. faecium
L. monocytogenes
MTBC
N. meningitidis
S. aureus
Shigella

Viral coming soon



Input files

Parameters

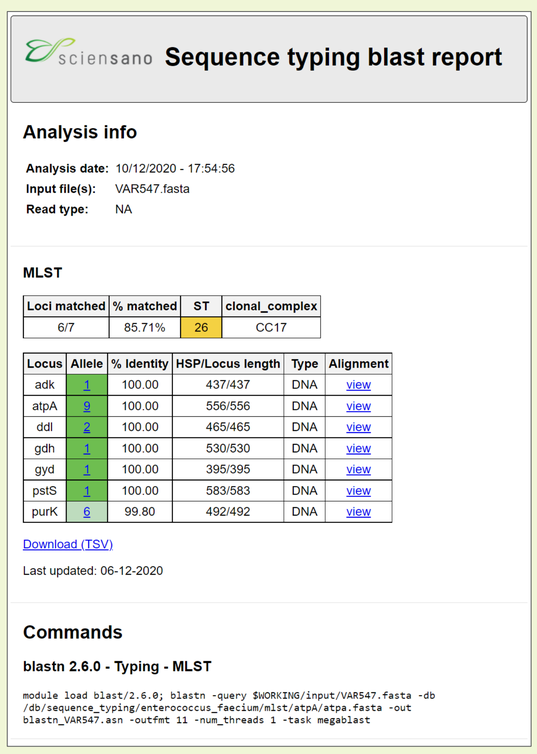


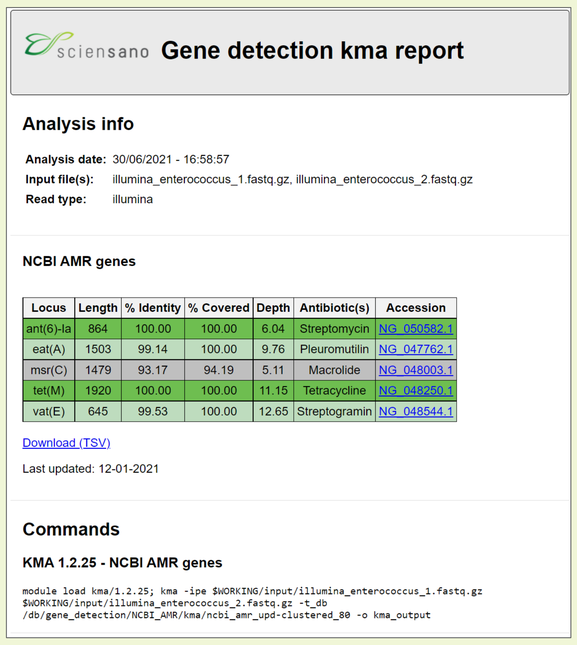
Custom stand-alone tools and wrappers

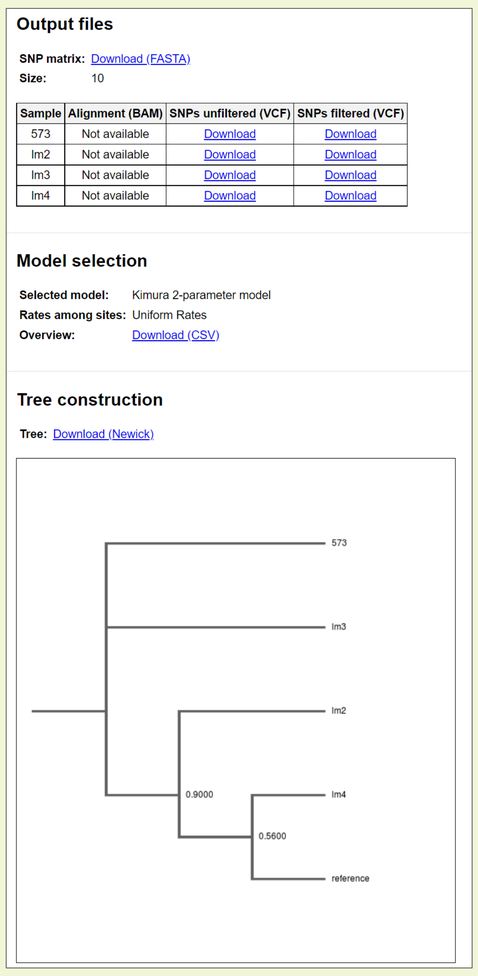
Isolate characterization
Gene detection (BLAST, KMA, SRST2)
MLST (BLAST, KMA, SRST2)
PointFinder
SCC*mec* typing (*S. aureus*)
spa typing (*S. aureus*)
SRST2 base tool
Variant calling
Variant filtering

Phylogenies
MLST tree
MEGA
SNP phylogeny (CFSAN)
SNP phylogeny (samtools)

Quality control
CheckM
CheckV
ConFindr

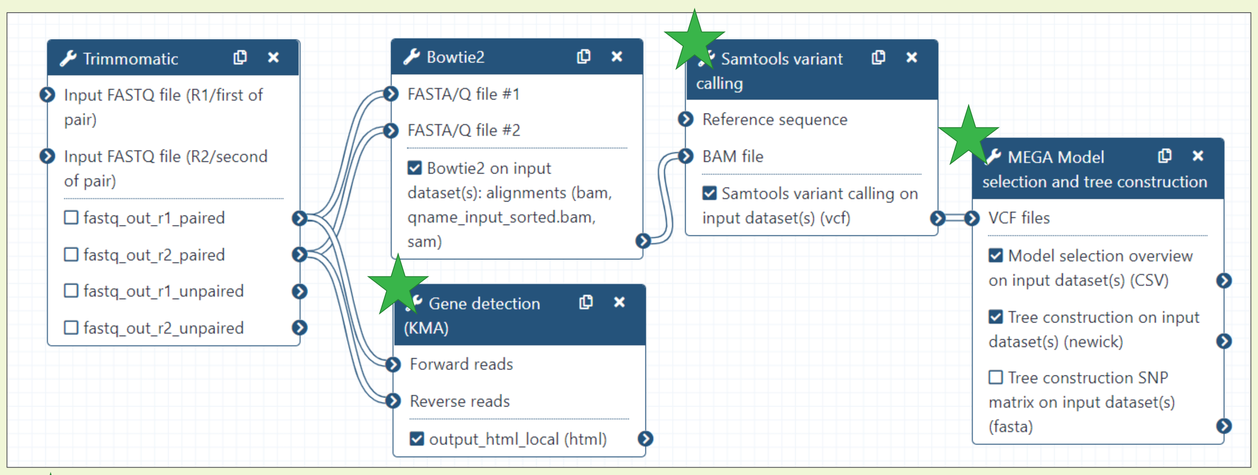






- Interactive
- Individual files can be downloaded
- Traceability (databases, commands, …)

Compatibility with toolshed tools



★ Custom tools

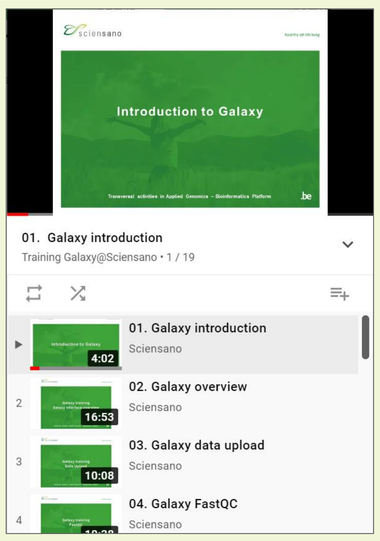
- Usage

> Galaxy

> Specific tools / analyses

- Interpretation of the results



Conclusion

This Galaxy-based platform has contributed to the successful integration of WGS into the routine and research activities of Sciensano and is freely available for non-profit and academic usage at https://galaxy.sciensano.be/.
