# Anatomy of an ELIXIR Service

*ELIXIR All Hands , 10-12 June 2024, Uppsala, Sweden*

## ELIXIR Node Services: 540 and counting

**ELIXIR Services are technical or administrative services provided by the Nodes to the bioinformatics community.**

**ELIXIR Services are diverse - they include reference databases, Cloud-based analysis platforms, data standards and software tools. They are each different - but what do they have in common?**

### Operations
Has a team to operate and support it. this may include biocurators, infrastructure professionals, and developers.

Biocuration FG | Professionalising Careers in Research Infrastructures FG

### Service Level
Runs to some target level - ranging from support for user queries to operating as a key Infrastructure Service.

Infrastructure Services

### Community
Connects users and developers to get feedback and promote adoption through user groups and ELIXIR Communities.

Galaxy Community | TeSS Club | WorkflowHub Club

### User Support
End user focus in the service design, with active communication channels and specialist consultancy.

info@elixir-europe.org | Consulltancy Services

### Licencing
Appropriate licensing supports re-use and maximises research impact.

RDMkit on licensing | FAIRCookbook on licensing

### ELIXIR Node Services

#### Key Service Collections
Highlighted for their service quality and international significance

- ELIXIR Core Data Resource: 31
- ELIXIR Deposition Database: 21
- ELIXIR Recommended Interoperability Resources: 16

#### Service Bundles
Groups of Services which work together as specialist solutions for a particular user type

- Plant Sciences: 29
- 3DBioinfo: 8
- Rare Diseases: 11

### Governance
Clear decision making with external review and advice, to enable federation or multi-Node solutions.

Multi-Node Services | Scientific Advisory Board

### Software
Open Source Code, software quality and benchmarking, and connecting to the wider developer community.

EVERSE | ELIXIR Software Ecosystem

### Infrastructure
Cloud-first portability and resilience, EOSC and EuroHPC partnerships, sensitive data handling.

ELIXIR Cloud | EOSC-ENTRUST

### Citability
Open publication with a commitment to researcher, developer and curator credit and attribution.

FAIR principles | FAIR4RS principles

### Training:
Co-developed services, documentation and training, following best practices and published for re-use.

Train the Trainer | Learning Paths FG | Training material - TeSS

### Findability
Registration in specialised global online catalogues for the types of service to reduce duplication; connections to EOSC.

FAIRsharing.org | bio.tools | Ontology lookup service

### Impact & Metrics
Collects data on the usage of the Service and also on the impact and the value added beyond the users.

AIM metrics | ELIXIR Impact Toolkit

## Contact

On behalf of the ELIXIR Technical Coordinators Group.

Federico Zambelli
ELIXIR-IT Technical Coordinator
f.zambelli@ibbe.cnr.it

Peter Maccallum
ELIXIR Chief Technical Officer
peter.maccallum@elixir-europe.org

Anna Golobardes Vilarasau
ELIXIR-ES Technical Coordinator
anna.golobardes@bsc.es

Salvador Capella-Gutierrez
ELIXIR-ES Technical Coordinator
salvador.capella@bsc.es

David Lloyd
Project Technical Coordinator
david.lloyd@elixir-europe.org
