SPLASH: Consolidating the infrastructure that sustains the Training Lifecycle

The ELIXIR Training SPLASH is a comprehensive guide for trainers to plan, design, deliver, and evaluate training activities, following the training lifecycle.

Created by the ELIXIR Training Platform, it aims to establish a digital "one-stop-shop" for training services to enhance visibility, accessibility, and participation within and outside the ELIXIR community.

SPLASH will consolidate access to various ELIXIR training resources and adopt a user-centric approach to present information in a ready-to-use format, modeled after the successful RDMkit and ELIXIR Toolkit.

Training Platform Work Programme 2024-26

WP2 Consolidating the Training Platform Infrastructure (services and resources)

Activities

- **Expanding the TMD to support communities and standards**
  - Review and update the assessment metrics
  - Expand the functionality of the TMD
  - Demonstrate through specific pilot cases (Node / Bioconductor)
- **Establishing the technical infrastructure and operations of the Training Platform's Training Life Cycle**
  - Define and implement the technical requirements, services and governance structures
  - Provide a production environment for new platforms (such as the Certification platform, Training SPLASH website etc).
  - Support the automatic population of training events in TeSS

Key expected outcomes

- Updated assessment metrics
- SPLASH website publicly available
- Updated functionality for TMD

WP3 Consolidating ELIXIR Training standards and best practices for Open science and Open education

Activities

- **Unleashing the ELIXIR Training Lifecycle**
  - Consolidate the components of the training life cycle
  - Define the guidelines needed by the complete training life cycle
  - Demonstrate the use of the guidelines through pilot cases
- **Defining a Training Platform Standard Operating Procedure**
  - Formalise the roles, responsibilities, and expectations of a Training Coordinator and a member of the Training Platform
  - Collect additional Node-specific expectations for a TrC
  - Define a comprehensive onboarding process for new TrCs

Key expected outcomes

- Consolidate key components of the ELIXIR Training lifecycle
- Present the Training lifecycle in SPLASH
- Identify main components of Training Coordinator and Platform member roles
- Summarise and enrich onboarding practices for Platform-associated roles

WP4 Train-the-Trainer programme consolidation

Activities

- **Consolidating the TtT programme, materials and content**
  - Populate the dedicated TtT webpages/portal in the Training SPLASH
  - Development of further materials for specific needs,
  - Create a professional guide with a step-by-step procedure to FAIRify training materials (based on the FAIR training handbook), and apply it to the FAIRification of TtT materials.
  - Set up a strategy and identify indicators to assess the impact of the TtT programme
- Nurturing of the TtT instructors' community
  - This activity will be funded and covered as part of the ELIXIR 2024-2028 Programme People Tier.

Key expected outcomes

- A professional guide with to FAIRify training materials
- Train-the-Trainer page in SPLASH
