ELIXIR-UK

Emily Delva[1]; Catherine Knox[1]; Nicola Soranzo[1]; Neil Hall[1]; Carole Goble[2]
1: Earlham Institute, UK; 2: The University of Manchester, UK

Our Mission is to deliver on the National Funders Vision for Fair Data Infrastructure within the Life Sciences

The UK Node is a consortium of 24 Universities and Research Institutions:

- Earlham Institute
- Heriot Watt University
- Imperial College London
- King's College London
- Newcastle University
- Open Life Science ◆
- Quadram Institute
- Rothamsted Research
- The Open University ◆
- The University of Birmingham
- The University of Liverpool
- The University of Manchester
- The University of Nottingham
- UK Centre for Ecology & Hydrology
- University of East Anglia
- University of Bradford
- University College London
- University of Cambridge
- University of Cardiff
- University of Dundee
- University of Edinburgh
- University of Exeter ◆
- University of Leicester
- University of Oxford

◆ = joined in the last 12 months

ELIXIR-UK participates in activities across ELIXIR

Lead on **1** Platform
Lead on **4** Communities
Lead on **5** Focus Groups

Involved in **8** European Projects

New Services

RDMkit, VV, Missense3D, Cafe Variome

New Roadmapped Services

UK CYVERSE, BRepertoire, Health Informatics Centre

The UK Node contributes 32 Services in total to the ELIXIR portfolio.

BioFAIR

A new digital research infrastructure that will improve Research Data Management at UK Research Performing Organisations (RPOs) by developing and operating a national BioCommons to maximise the **F**indability, **A**ccessibility, **I**nteroperability, **R**eusability (**FAIR**) and Reproducibility of life science data.

BioFAIR Data Commons
- National data catalogue over a federated data lake

BioFAIR Computational Method Commons
- National analysis capability using computational workflows and notebooks

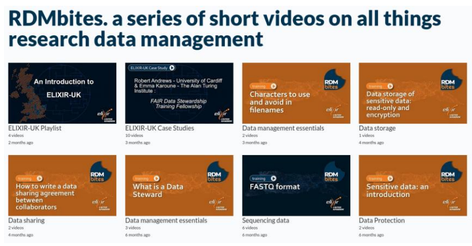
BioFAIR Integrated Data Services
- Metadata and Standards framework based on FAIR Digital Objects and APIs (Bioschemas, RO-Crate, ISA)

UKRI's Infrastructure Fund will invest initial seed funding of £6.3 million over the next three years; case for further funding proposed to IF/DRI.

DaSH Project and Fellowship

- Building capacity and professionalising data stewardship while leveraging the local expertise
- Creating a data management culture change from within the institutions

24 Fellows
2 Cohorts
17 Organisations



Funded as part of the "UKRI Innovation Scholars: Data Science Training in Health and Bioscience (DaSH)" call.

Latest News

Introducing FAIR Pointers, a course to embed FAIR data into the Life Sciences

Written by ELIXIR-UK members and DaSH Fellows, FAIR Pointers is an online course that is catered towards those with little or no experience around 'FAIR data' and how that can be intertwined into research practice.

Find the course here:

House of Commons "Reproducibility and Research Integrity" report includes ELIXIR-UK evidence

In May 2023 the Science, Innovation and Technology Committee of the UK House of Commons published a new report about "Reproducibility and Research Integrity", which includes written evidence contributed by ELIXIR-UK during the related inquiry in 2021.

ELIXIR-UK Case Studies videos

Last year ELIXIR-UK launched a series of YouTube videos based on Case Studies of our members, including videos about 'Training in the UK', 'Data Management with RDMkit', 'FAIR Cookbook and collaborating with pharmas' and more.

Check out our videos here:
