Enhancing Bioinformatics Training Through ELIXIR-GOBLET Train-the-Trainer (TtT) Programme

Patricia M. Palagi[1], Allegra Via[2], Lisanna Paladin[3], Khaled Jumah[4], Katarzyna Kamieniecka[4], Krzysztof Poterlowicz[4]

The ELIXIR-GOBLET Train-the-Trainer (TtT) programme fosters a network of trainers, the TtT instructor's community, to allow them to benefit from reciprocal support and exchange of experiences. TtT courses aim to give new instructors tools and tips for providing an enriching learning experience to trainees, irrespective of topic, and to include best-practice guidance on course and training material development.

590 people trained
43 TtT courses
~20 TtT instructors

Community

Join the Community

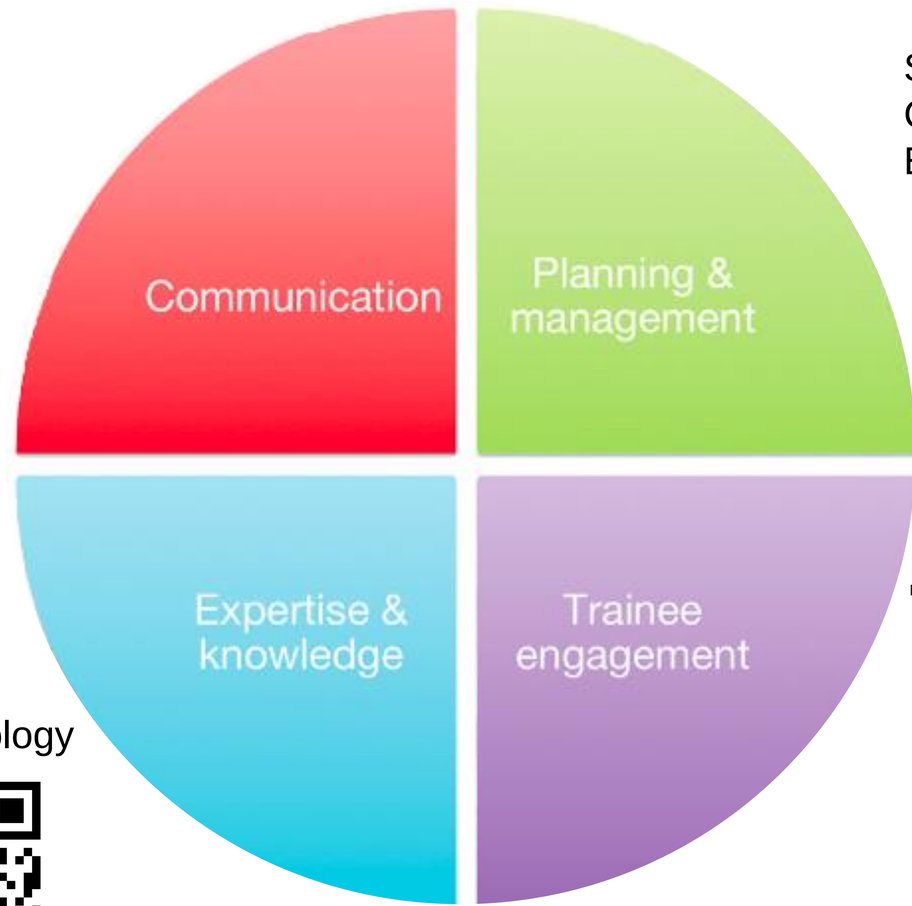
The TtT Community is an open network that supports trainers and encourages the exchange of experiences, while promoting best practices and continuous improvement in training delivery and course development.

- Monthly Zoom meetings
- Slack channel: #ttt_instructors (elixir-europe.slack.com)

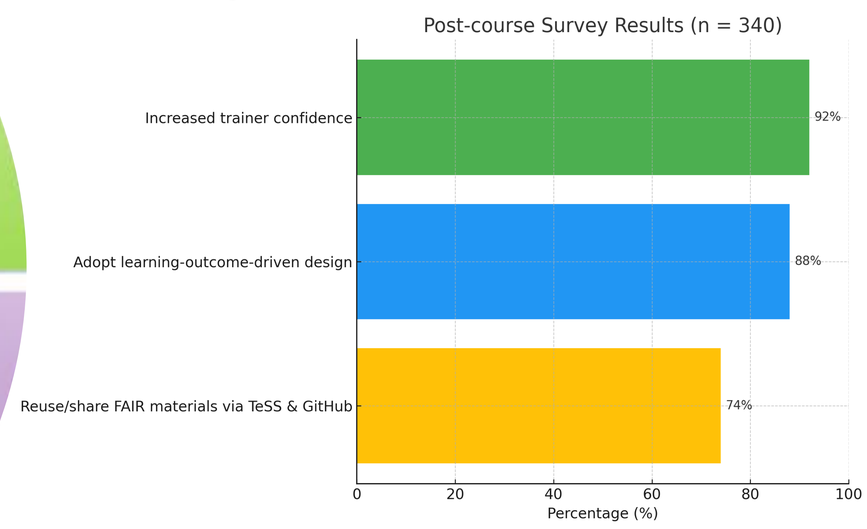
New topics

1. Practical application of training in a digital environment - making use of the EeLP in topical training
2. Practical use of the ELIXIR Training Lesson template
3. Training strategies for in person vs online teaching
4. Developing effective learning paths
5. Communication skills for trainers, including learning about posture, body language, pace and interaction with the trainees

Verbal communication skills
Written communication skills
Presentation skills



Session planning
Curriculum planning
Event management



Subject area knowledge
User application awareness
Knowledge of training methodology

Flexibility in delivery
Empathy with trainees
Understanding and knowledge of trainees

Key resources

- Training materials - ready to be used
- Skilled & enthusiastic TtT instructors - Community of Practice

Feedback

- Post-course surveys (n = 340) show:
  - ▲ 92 % increased trainer confidence
  - ▲ 88 % adopt learning-outcome-driven design
  - ▲ 74 % reuse/share FAIR materials via TeSS & GitHub
