FARMBID

Farmbid is an **innovative agricultural mobile bidding platform**, free-for-all Android and IOS based mobile application.

The existence of FarmBid is to **raise the awareness of the exploitation of middlemen** in agriculture sector through **purposely overestimated deduction rates** to secure their profit margins, leaving farmers with **inadequate income**.

Thus, FarmBid has the capability of **providing a sustainable and high income** for farmers, **eliminate the opportunity for middleman to monopolize the market** which allows **direct negotiation from farmers to distributor**.

OBJECTIVE

- Minimalize manipulation from middleman towards farmers
- Direct negotiation between farmer and distributor
- Ability to sell the production at its fullest using **2** selling methods: Fix Price, Open for Bidding

Problem Statement

- Low agricultural profit
- High cost of production
- Low productivity
- Overestimate deduction rate
- Lack of an effective supply chain from farmers' perspective
- Farm produce are subjected to vicious price fluctuation

Idea Background - WHY

- Low profit for farmers for product solds
- Studies show that most of the price of the products are being controlled and manipulated by the middleman
- Farmers do not have a wide and effective business network compared to middlemen
- Farm produce are subjected to vicious price fluctuations due to unpredictable weather
- Example: Selling price of ladies' fingers in Klang Valley ranges between RM7 and RM11 per KG. However, middlemen's buying price is RM 0.99 per KG.

Expected contribution/ impact to society

- Higher agricultural profitablity
- Healthier farmers' community
- Better food quality for consumers
- Reduce the poverty rate among farmers
- More goverment support in agriculture sector

Solution - HOW TO DO IT & WHEN

- Collaboration with any available government agencies which have the grant and policy that includes people from rural area
- Advertising
- Social Media Promotion
- FarmBid's video intro
- Education for farmer about Farmbid and IT

Facts!

Farmers' Population

Malaysia - 1.844 million

SEA - 71 million

World - 280 million
