@bgeedb

Integration of single-cell with bulk RNA-Seq to provide a unified view of gene expression and analysis tools in Bgee

Annotation

Single cell experiment → Cell → Post-composition Cell (Cell ontology) ~ Organ (Uberon)

Integration

Full length → Individual cell

Target-based → Cell population

gene is present if expression is over intergenic noise

gene is present if present in pop & 1 read in cell

Integration

- Calls
- Expression score
- False discovery rate
