RDMkit

A key resource for FAIR data management

Scan to visit the RDMkit
rdmkit.elixir-europe.org

The ELIXIR RDMkit has emerged as a reliable resource, offering best practices for Research Data Management (RDM), acting as a hub of RDM information. RDMkit offers comprehensive advice for each stage of the data lifecycle as well as tailored guidance specific to individual domains, addressing their unique requirements. Guided by a community-driven model, RDMkit has contributions from data stewards, researchers, and RDM experts from all areas of life sciences. Since its launch in March 2021, the RDMkit has grown significantly with new content and features being continuously added. To keep RDMkit relevant, and fit for purpose existing content is regularly updated via contentathons, a practice to be continued as a part of the ELIXIR RDM community. Recently launched RDMkit Club will enable discussions for the sustainability and future directions of the RDMKit.

Best practices for research data management

Data life cycle stages
Data management aspects to be considered for each stage of the data life cycle.

Tool assembly
Examples of tools assembled into an ecosystem to cover research data management tasks.

Your tasks
Considerations, solutions and tools for tackling common data management tasks.

Your role
Useful resources for your job and career path.

Your domain
Best practices and tools used in your domain or by your research community.

National resources
Pointers to Country-specif c information resources and national best practices and guidelines.

Integration with others resources

Data management for everyone

- Researchers and scientists
- Data managers and data stewards
- Multi-partner project coordinators
- Funders and policy makers

RDMkit Alliance

The RDMKit Alliance will encourage the worldwide RDM community to adopt the components and practices of the RDMkit. It will create a forum to collaborate and communicate RDM best practices

More info

Community

RDMkit is hosted on GitHub, so the hosting is free. It also uses the ELIXIR Toolkit theme, an open-source and Jekyll theme.

Get involved
- Contribute to RDMkit with data management best practices.
- Become a member of the RDMkit editorial board.

RDMkit Club
- Open community that works together to discuss all topics related to RDMkit and help its users, contributors and editors
- Informal drop-in sessions via Zoom, held on the last Thursday of each month. Details: **rdmkit.elixir-europe.org/rdmkit_club**
- Slack channel: #rdmkit-club (elixir-europe.slack.com)

Growth and engagement
