Setting the ground for Biological Data Management and Interoperability in Portugal

ELIXIR All Hands 2022, 7-10 June, Amsterdam, Netherlands

Jorge S. Oliveira[1,2], Carolina Ventura-Costa[1,2], Daniel Faria[1,4], Pedro Barros[1,5], Inês Chaves[1,5,7], Célia Miguel[1,6], Tiago Paixão[1,2], Ricardo Leite[1,2], Pedro Fernandes[1,2], Ian Teixeira[1,3], Ana Francisco[1], Alexandre Francisco[1,3], Mário J. Silva[1,3] and Ana M. P. Melo[1,3*],

1. ELIXIR Portugal | BioData.pt, Oeiras, Portugal / 2. Instituto Gulbenkian de Ciência, Oeiras, Portugal / 3. INESC-ID, Portugal / 4. LASIGE, Faculdade de Ciências da Universidade de Lisboa, Lisboa, Portugal / 5. ITQB NOVA, Oeiras, Portugal / 6. BioISI, Faculdade de Ciências da Universidade de Lisboa, Lisboa, Portugal / 7. IBET, Oeiras, Portugal

ELIXIR Portugal | BioData.pt is strongly committed to ELIXIR's mission, particularly with respect to the **development** and **adoption of best practices** in **data management** and **open science**.

"Ready for BioData Management?"

Capacity building program in data management for the life sciences

TRAINING PROGRAMS

Introduction to Data Management Plans

Full day hands-on course aiming to teach the basics of making and using Data Management Plans (DMP) in the context of research activities.

Advanced Data Management Plans

One-day hands-on course where participants prepare a DMP in the platform *DMPOnline* according to the H2020 template.

More than **300** researchers trained on building DMPs

Training Data Stewards for Life Sciences

The **1st** training program for data stewards in Portugal with **24** participants from **14** institutions and > **63 h** of training.

February → DS Intro course → Assignment → DS Lab1 → Assignment → DS Lab2 → Assignment → Consolidation course (October)

- DS Intro course:
  - Data Stewardship
  - FAIR & Open Science
  - Funders policies
  - Data Management Plans

  and much more...
- DS Lab1:
  - Institutional DM policy
  - Institutional DM Plan
  - Feedback to participants & Review
- DS Lab2:
  - Dataset annotation and submission to DMPortal
  - Feedback & Review
  - Deeply explore metadata and ontologies
- Consolidation course:
  - Develop guidelines for a specific stage of the Data Life Cycle, based on the RDMkit
  - Feedback & Review

CREATING INSTITUTIONAL CAPACITY

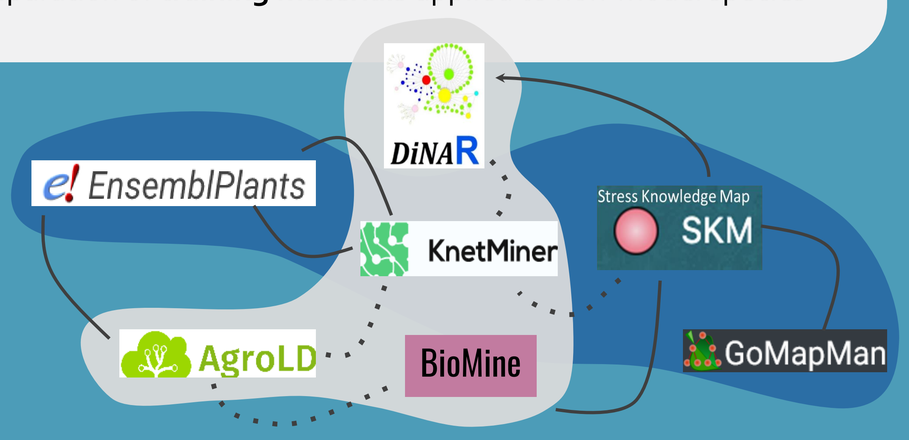
The **first Data Steward** hired in Portugal working on a research and innovation institute

- Survey current requirements & issues among the research institution
- Develop solutions for the management of scientific data, in the context of a research institution
- Define RDM policy, workflows, and procedures in line with international best practices
- Develop support materials: in-person guidance, workshops, and training courses
- Provide support on electronic notebook, and forward users' requests to the software developer

Integration of data from a non-model tree (Q. suber)

Implementation study:
Increasing Plant data findability and reuse beyond ELIXIR

- **Adapt** and **integrate ELIXIR plant services** and **tools** through service bundles
- *Q. suber* genomic data used as test case for **the data visualization bundle** for plant 'omics'
- Preparation of **training materials** applied to non-model species



bundles to be created — Plant gene function/orthology tools
existing bundles — Plant analysis/visualisation tools

Implementation of the Local European Genome-Phenome Archive (EGA)

	Local EGA	Beacon v2
Providing feedback as deployers	✓	✓
Deployed docker prototype of localEGA ingestion system	✓	
Connection to real central EGA	✓	
Performed live test of data (and metadata) upload	✓	
Currently testing components with synthetic data	✓	✓
Deploying and testing API		✓
Integrating variant calling pipeline	✓	✓

aligned with

Portuguese Initiative of Genomics Medicine (national initiative)

Beyond One Million Genomes (international initiative)
