TeSS: A Portal for Training Resources in ELIXIR and Beyond

Munazah Andrabi[1], Finn Bacall[1], Ivan Kuzmin[2], Hedi Peterson[2], Carole Goble[1]

SCAN ME

A gateway, showcase and catalogue aggregating events and training materials

One-stop shop for **trainers** and **trainees** to discover online information and content e.g., training materials, tutorials, online courses and events

An **added value service** with curated and organised content: collections, customised training workflows, Learning Paths

Training resources are automatically discovered and registered in TeSS utilising automated scrapers and open standards e.g., Bioschemas and EDAM

Content extracted from provider sites is linked with other registries and accessed through various media

Materials: Training resources in a variety of different formats, including online tutorials, videos, slides etc
Events: Face-to-face or online training opportunities that have set start and end times
Workflows: Create visually intuitive displays of different types and approaches to training, at different levels of granularity
Collections: Related training materials/events for domain of study grouped together
Learning Paths: A pathway to guide the learner through a set of learning modules to be undertaken progressively, from beginner to advanced level (**Coming Soon**)

Get your Materials in TeSS

Bioschemas

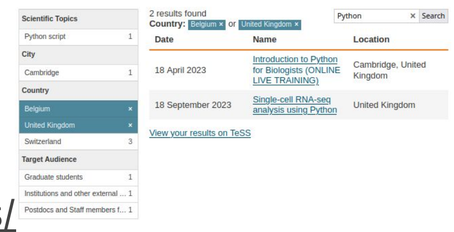
Annotate your website with Bioschemas markup to quickly and easily add your training resources to TeSS

- TeSS harvests new and updated content daily, saving the need for manual form filling
- The following Bioschemas profiles are supported
  - Course & CourseInstance
  - Training Material
  - Event (Legacy)

Widgets

Easily embed live TeSS content in your webpages

- Useful for training providers whose content changes frequently, or who have limited control of their website
- Various styles & functionality (and extendable if needed)
- Can be scoped (e.g. to only show certain providers' content)



https://elixirtess.github.io/TeSS_widgets/

Structured Annotation

- Training materials/events can be annotated with EDAM ontology terms

Links with other tools & registries

- Training can be linked to and from resources in other registries such as bio.tools and FAIRsharing.org
- Relevant training materials are linked and showcased in the RDMkit

TeSS as a National Resource

Current scenario

- 23 member nodes with varied levels of engagement
- Promote TeSS as a national training resource for each node
- National Instances implemented by SciLifeLab (Sweden) and Taxila (Netherlands)

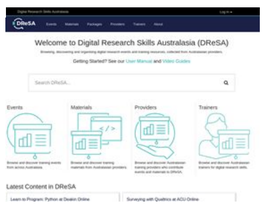
Future proposition

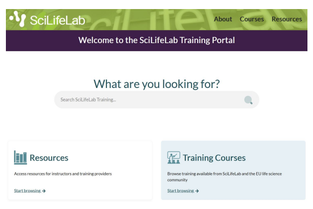
- Implementing prototype of a node specific portal showcasing the node training in TeSS (UK as a test case)
- Curation and tagging of existing training content

TeSS Global Usage

TeSS is an open source, reusable software platform, and has been deployed by several other communities across the globe:

- **Digital Research Skills Australasia** (https://dresa.org.au/)
- **Photon and Neutron** (PaN) training (https://pan-training.eu/)
- **Taxila:** Open science training in the Netherlands (https://taxila.nl)
- **SciLifeLab** (https://training.scilifelab.se/)





Join the TeSS Club!

The TeSS Club is an **open community** that works together to continuously develop the TeSS portal and help its users

- Bi-weekly Zoom meetings
- Slack channel: #tess-club (elixir-europe.slack.com)
- More details: https://elixirtess.github.io/about/
