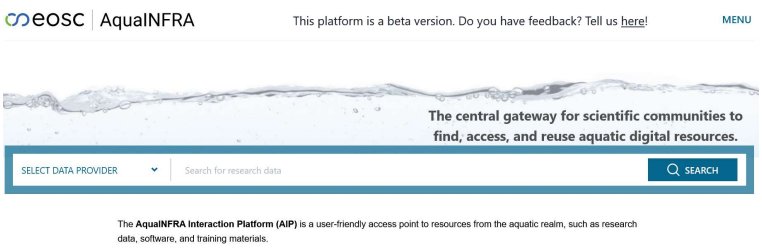
The AquaINFRA platform

A research data infrastructure for marine and inland waters

Markus Konkol[1], Merret Buurman[2], Vanessa Bremerich[2], Sami Domisch[2], and Jakob Bernd[1]
1) 52°North Spatial Information Research GmbH, Münster, Germany
2) Leibniz Institute for Freshwater Ecology and Inland Fisheries, Berlin, Germany
Contact: m.konkol@52north.org

Objectives

- develop a virtual environment equipped with FAIR multi-disciplinary data and services to support marine and freshwater scientists
- enable stakeholders to store, share, access, analyze, and process digital research objects across research infrastructures & disciplines



AquaINFRA Interaction Platform vs. Virtual Research Environment

AIP

1. Enable searching
2. Allow access
3. Improve information retrieval

in order to →

1. Increase discoverability
2. Facilitate inspection
3. Develop (initial) understanding

VRE

1. Reproduce & investigate
2. Analyse & develop
3. Publish & Share

in order to →

1. Support (deep) understanding
2. Improve reusability
3. Support FAIRness & visibility

Platform

Website

Architecture
