Biodiversity Community

ELIXIR All Hands , 5-8 June 2022, Dublin, Ireland

Biodiversity loss is recognised as a major challenge for humankind. ELIXIR can help address challenges in biodiversity science, through leveraging its services and expertise to enable data management and analysis activities that enhance our understanding of life on Earth and facilitate biodiversity preservation and restoration.

Community Actions

Focus Group Kick-Off F2F Jan 2020

- Regular monthly FG meetings online **coordinating activities**
- ~8-9 Nodes with regular involvement in meetings and actions
- Catalogue of **ELIXIR Services** supporting biodiversity research

F1000Res. Recommendations 2021-22

Community F2F September 2023

- Hybrid meeting in Barcelona 13-14-15.09
- Also with time to work on the **Implementation Study**

Community Goals

Develop standards & promote best practices in biodiversity research

- Global standards, formats, guidelines, ontologies etc.
- Best practices in Research Data Management etc.

Develop tools & workflows that enhance biodiversity data analyses

- Dissemination of biodiversity-related analysis tools & services
- Connect tool developers with data-generation initiatives

Enhance biodiversity database/resource usability & interoperability

- Improving connections amongst biodiversity data resources
- Collaborative exchanges between users & developers

Organise biodiversity tools-&-data training & knowledge transfer

- How to benefit from using available standards & best practices
- Training user communities with informatics tool developers

Implementation Study

- Launch & 1st meeting online June 1st 2023
- 31 participants from ELIXIR FR, GR, IT, DE, PT, UK, CH, HU, SE, EMBL-EBI, IE, NO, ES, and CZ
- WP1 - Research Data Management and Data Interoperability
- WP2 - Services, Tools, and Analysis
- WP3 - Outreach, Networking, and Communications
- WP4 - Training and Knowledge Transfer
