Training and Capacity Building in Data Management - **WP2** CONVERGE

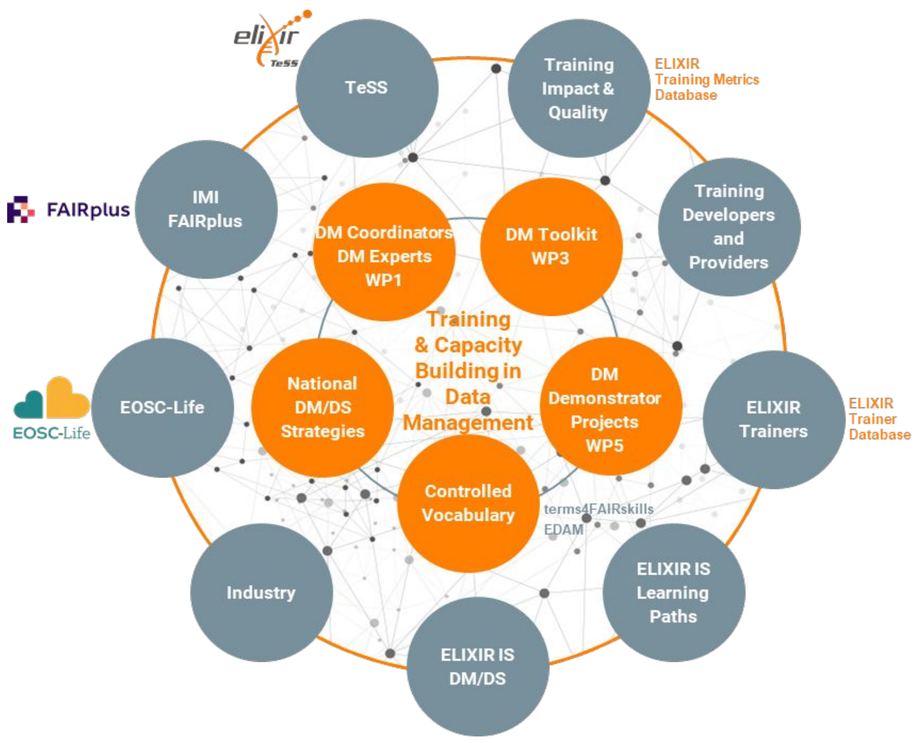
Celia van Gelder, Alexia Cardona, Brane Leskošek, Patricia Palagi
On behalf of the ELIXIR-CONVERGE WP2 partners

The Training and Capacity Building in Data Management (DM) and Data Stewardship (DS), WP2 in ELIXIR-CONVERGE, aims to build a comprehensive, interconnected and sustainable programme in Data Management (DM) across all Nodes. Halfway through the life of this project, we present here an analysis of the achievements and outcomes.

WP2 at a glance:

Data Management and Stewardship Training by the Nodes for the Nodes

- Design, build and deliver DM/DS Training
- Build DM/DS training expertise in the Nodes
- In alignment with national DM/DS strategies



WP2 in numbers

WP2 facilitated the development and delivery of Data Management and Stewardship training materials and courses in the Nodes by connecting and supporting the **22 Nodes** participating in CONVERGE since February 2020.

71 Training events
from Feb 2020-Dec 2021

16 Countries
organised training in Data Management

2105 Participants

Co-production model: connected to all other **WPs** in CONVERGE

WP2 Tasks Overview

Identify training needs and develop solutions

- Training Inventory and Roadmap established
- Establish an ELIXIR Lesson template for collaborative training development
- **14** topics identified in gap analysis
- **4** training topics prioritised and are currently developed collaboratively

1. Data Management and Stewardship
2. Reproducibility
3. FAIR
4. Data Management Plans
5. ELIXIR RDMkit
6. Policies
7. Ethics
8. Capturing/collecting/creating data
9. Finding/discovering/reusing data
10. Infrastructure for storing and sharing data
11. Documenting and organising data
12. Processing and analysing data
13. Metadata
14. Publishing, sharing and archiving data

Train-the-Trainer (with ELIXIR Training Platform Task 4)

- Survey (2021-2022) - challenges in teaching DM/DS:
  - 52 answers from 14 ELIXIR Nodes, USA and Algeria (In- and outside Life Sciences Domain)
  - Main challenges:
    - Find good balance of lectures and practical activities; Dealing with non-uniform audiences; Make lessons interactive
- Lesson development in progress:
  - Train the data stewardship trainer on Findable Accessible Interoperable Reusable

Training needs and solutions for Use-cases

- With WP5:
  - Survey (2021) for all demonstrators
  - Identify existing training materials and define specific needs for demonstrators
  - Develop new training materials and organise courses.

Curating and annotating WP2 courses and materials

- Need for agreement about terminology/ controlled vocabulary for DM/DS
  - Established a curated list of terms
  - Collaborating with terms4fairskills (also in EOSC context) and EDAM
- Registering and annotating in TeSS, the ELIXIR Training Portal

Establishing training links between RDMkit & ELIXIR TeSS

Establishing Community of Practice of DM/DS Training

All Tasks are connected, and the majority of Nodes contribute to most Tasks!
