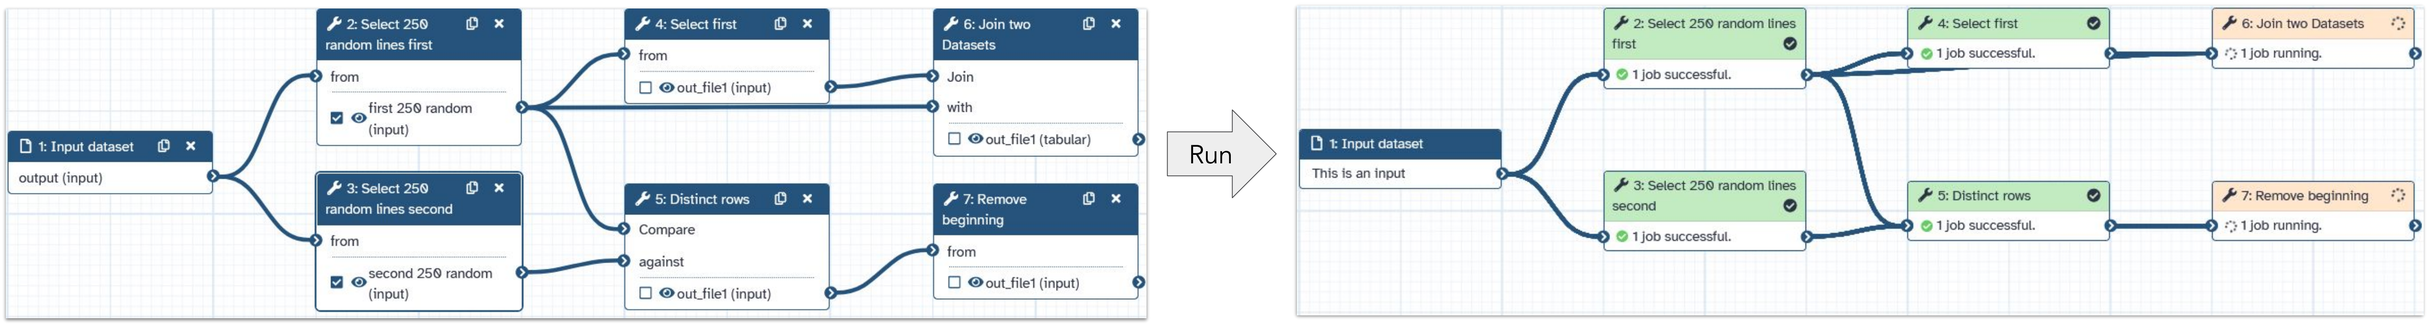
# Visualizing Workflow Runs in Galaxy

## *The Graph View for Workflow Invocations*

Ahmed Hamid Awan[1], Galaxy Project Developer Working Groups

[1]*Johns Hopkins University, USA*

## See your workflows run in real-time!

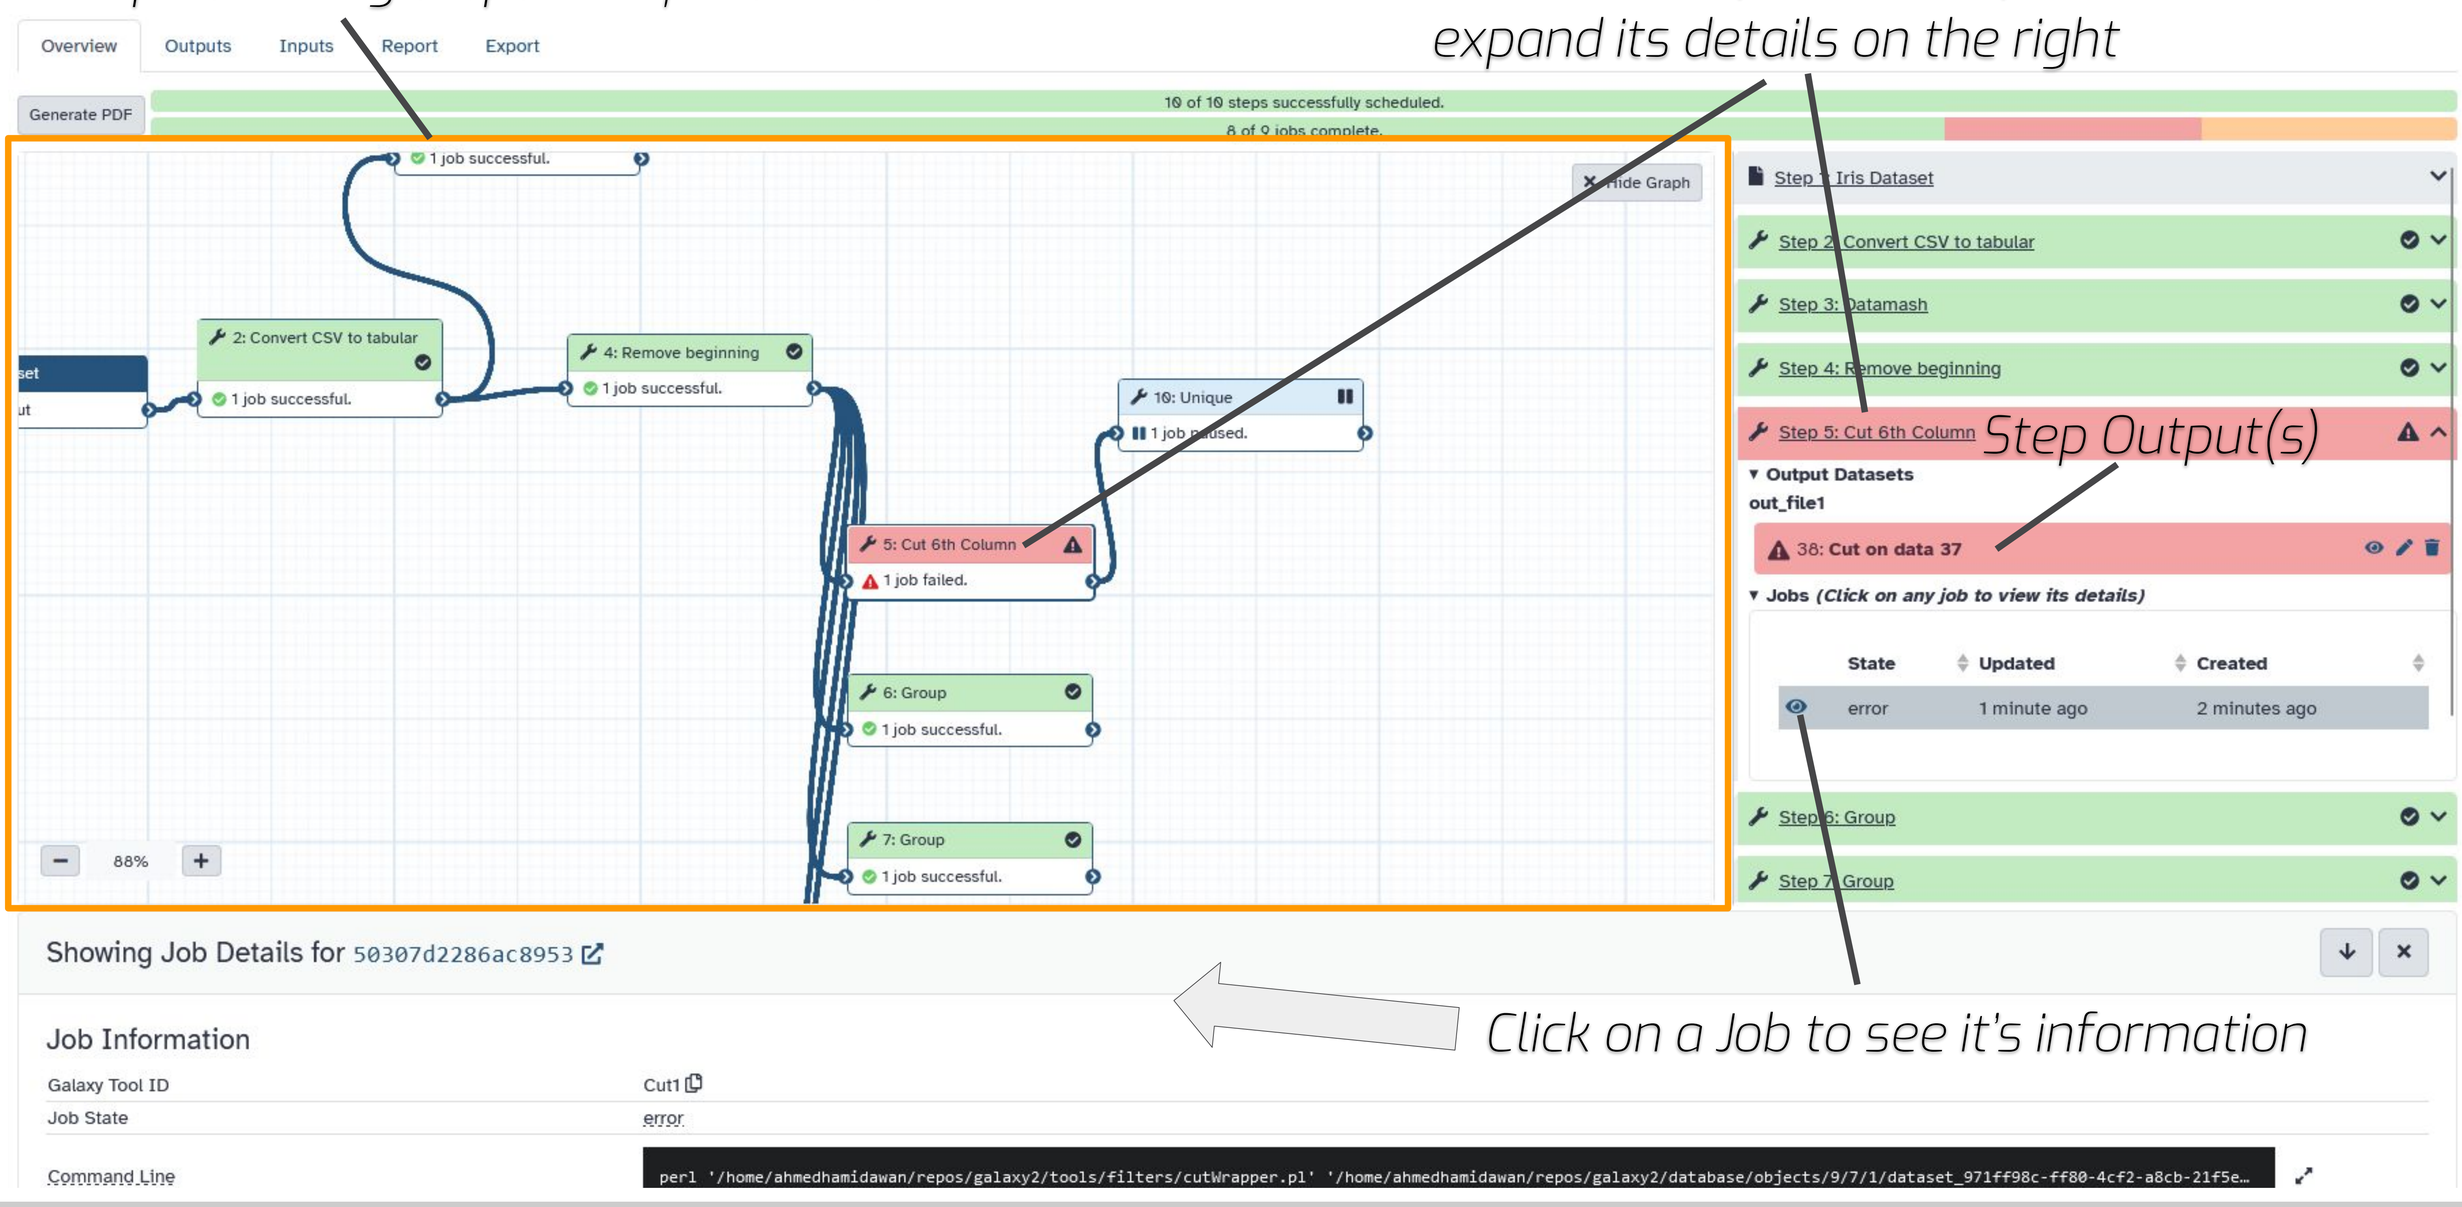


Once a workflow is run/invoked in Galaxy, users can monitor its progress in a newly introduced real-time, interactive graph view as shown above.

## Workflow Invocation Overview

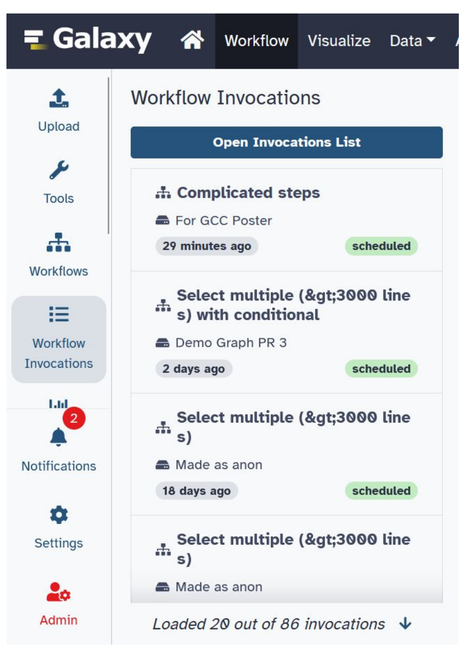
*Graph showing steps with job states*

*Click on a Step in the Graph to expand its details on the right*



*Click on a Job to see it's information*

This interface enables users to examine individual jobs for specific workflow steps, making it easy to identify points of failure.



All current or previously run workflows can be explored by clicking on the Workflow Invocations activity, which expands the list of invocations in a side panel.

Note: *An exhaustive table of all workflow runs is also accessible by clicking on the "Open Invocations List" button in the panel.*

We would like to thank our wonderful coworkers at the Galaxy Project for providing feedback and laying a solid foundation, *especially those who worked on the frontend and backend infrastructure of Galaxy's Workflow Editor in the recent years.* Major funding for the Galaxy Project is provided by NIH Grant 2U41HG006620. usegalaxy.org is supported by NIH and NSF Grants HG006620, 1661497, and 1929694. usegalaxy.eu is supported by the German Federal Ministry of Education and Research grant 031L0101C and de.NBI-epi. usegalaxy.org.au is supported by Bioplatforms Australia and the Australian Research Data Commons.
