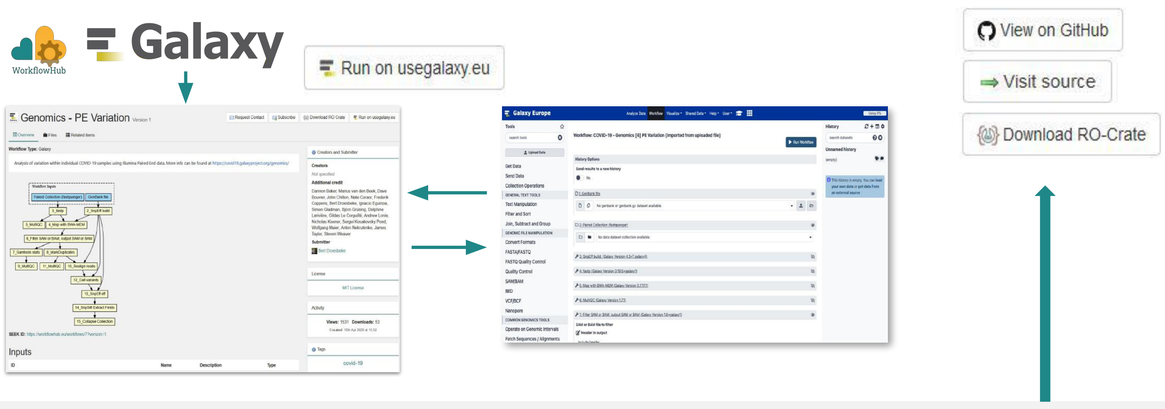
ELIXIR All Hands , 10-12 June 2024, Uppsala, Sweden

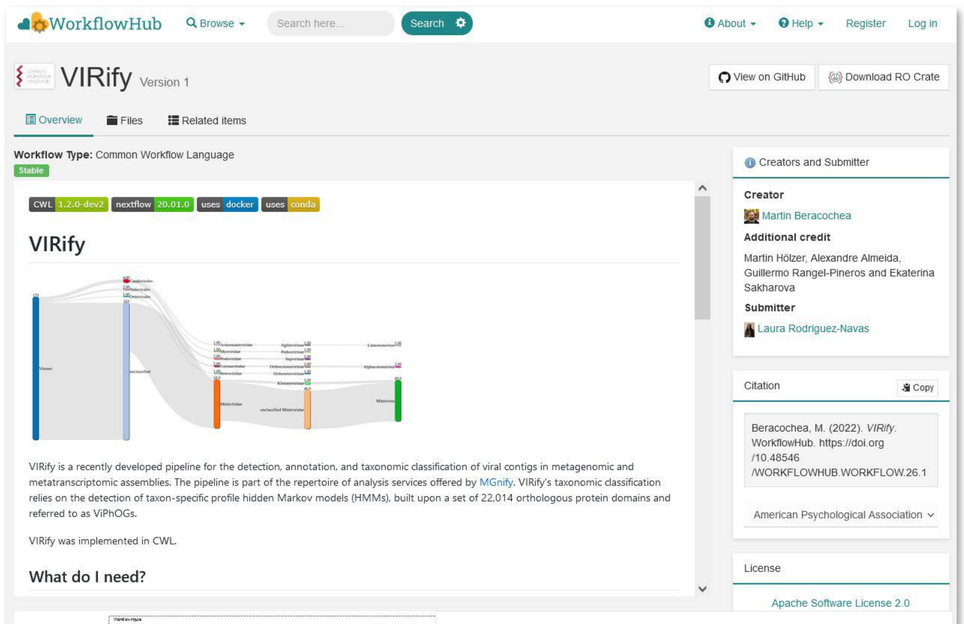
A FAIR registry for workflows

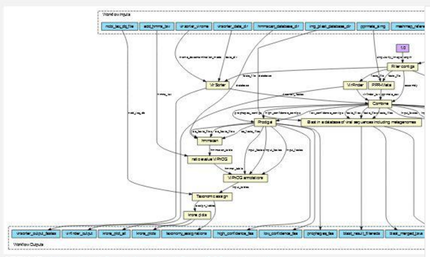
WorkflowHub is agnostic to Workflow Management Systems. We partner with popular and high profile platforms to co-develop and support metadata mark-up, packaging, registration, repository linkups, search & launching.

Workflows can remain and be accessed from their native stores with Git support. Discover workflows directly from a Workflow Management System (e.g. Galaxy Instance) or launch them from WorkflowHub using the GA4GH Tool Registry Service API.



Workflows can be uploaded / downloaded as Digital **Research Objects** using a specialised **RO-Crate** profile.





SEEK ID: https://workflowhub.eu/workflows/26?version=1

DOI: 10.48546/workflowhub.workflow.26.1

Inputs

ID	Name	Description
input_fasta_file	n/a	n/a
virsorter_virome	n/a	Set this parameter if the input fasta is mostly viral. S /issues/50
virsorter_data_dir	n/a	VirSorter supporting database files.
add_hmms_tsv	n/a	Additonal metadata tsv

Features

- Workflow types
- Metadata extraction
- Credit and citation
- Analytics
- Collections
- Faceted search
- ...and much more!

For workflow developers

- Hassle-free submission
  - Import from GitHub, GitLab or any public Git repository
  - Directly upload from your computer
  - Link to content on the web
- Describe your entry using a rich metadata model
  - Link to related publications, tools (via bio.tools), data etc.
- Works-in-progress are welcome
  - Indicate readiness with "maturity" labels
  - Make incremental changes via our Git-based versioning system
  - Display live test status via our LifeMonitor integration
- Mint DOIs for your workflows to make them citable

For workflow communities

- Describe and organize community activities on WorkflowHub
  - **Teams** are groups of individuals collaborating on a particular activity or area of interest
  - **Spaces** are groups of teams working on a broad activity, usually related to a funded grant
  - **Collections** are curated sets of workflows around a particular theme
- Distribute access and control visibility via policies, publish when ready
- Integrate automatic WorkflowHub submission into your CI pipelines *(Coming soon)*

Activities

The WorkflowHub Club

An open community that works together to perpetually develop the Hub and help its users.
https://about.workflowhub.eu/project/community/

FAIR Computational Workflows Working Group

A community of workflow developers and users discussing the standards, processes and recommendations that make computational workflows FAIR.
https://workflows.community/groups/fair/

WorkflowHub Publishers Forum

A collaboration with publishers to support the publishing of workflows associated with research publications; and publications that are about workflows.
https://bit.ly/3X2YZvh

WorkflowHub uses the open source FAIRDOM-SEEK infrastructure
